

Water Resources Expert

📅 Starting Sep/Oct 2018

🕒 24-40 hours/week

📍 Rotterdam

Introduction

52impact develops spatial information services that are mainly based on satellite imagery, but can also include other types of geodata. We provide information related to the quantity and quality of natural resources and we monitor the effect of a variety of human activities on our landscape (such as land restoration and construction works).

What makes us unique is that we not only look at the technical viability of our services, but also aim for sustainable business models and professional data visualisation and presentation. 52impact is therefore the link between technology and the market—we make complex satellite technology simple, beautiful and useful.

About the job

For the development of our water information software suite we are looking for a water resources expert. You will be our water domain expert who links user needs and (regional) water challenges to qualitative and quantitative water risk indicators.

It will be your task to:

- Create concepts and develop data components for water risk indicators
- Perform user requirements assessments for our water information software suite and related information services
- Support business development and commercial activities in the water resources domain

Your profile

University degree: you have an M.Sc. in a relevant technical discipline related to water resources / hydrology, or you have a proven track record in this field.

Preferred level of working experience: 3-5 years.

Technical skills: at least basic knowledge of remote sensing and GIS is required to develop proof of concepts of data components and risk indicators.

Languages: proficient in English (level C1), Dutch is a bonus.

What we offer you

At 52impact we offer you an extraordinary working environment. A chance to be part of the development of a new company with plenty of opportunities to grow. Since we are still small, you can really make a difference in reaching our goals. Does this appeal to you? Then there is more:

Challenging business

Would you like to work on international challenges using geodata and space technologies? You don't have to be a rocket scientist to be able to do that. We are active in application domains that are both relevant and inspiring, and that offer great opportunities for growth and development.

Freedom and flexibility

At 52impact we have flexible working hours and offer you a lot of freedom in combining work and private life.

Open and informal company culture

We greatly value an open, friendly and personal atmosphere. And we believe work should be fun, too. This means we go out for drinks regularly and there is always room for an informal talk on a personal level.

Create real impact

It's all in the name: at 52impact we want to create impact. Our team likes to work on useful information services that bring added value to the quality and sustainability of our planet. By joining our team, you will have the opportunity to contribute to reducing water risks worldwide.

Apply

Would you like to take on this challenge and become part of our company? And are you enthusiastic about our business and market domains?

Then please send your CV and a short motivation via email to sabine@52impact.nl. Maybe you will soon be part of our team!
